

# 25-1390(AEKYUNG AH-20900BA) Aliphatic Polyisocyanate

# TECHNICAL DATA SHEET

## APPLICATIONS

#### Automotive refinish and OEM

Heavy duty protective coatings

Polyurethanes requiring lower VOC

Polyurethanes requiring improved weathering

# DESCRIPTION

25-1390 is an aliphatic polyisocyanate based on HDI trimer and is supplied at 90% solids in butyl-acetate. Due to its low viscosity, 25-1390 is ideal for formulating high solids systems.

25-1390 can be formulated in clear and pigmented two component urethane systems. These systems will provide excellent weathering, chemical and abrasion resistance. In addition, they will have excellent gloss and color retention. Because 25-1390 is based on HDI trimer, it will usually offer better weathering performance versus biuret based products.

## SOLUBILITY AND COMPATIBILITY

25-1390 is completely soluble in xylene, toluene, ethyl acetate and butyl acetate.

# **KEY BENEFITS**

Abrasion resistance Chemical resistance Weather resistance

# 25-1390 can be blended with a variety of other aliphatic and aromatic polyisocyanates. It also has good compatibility with many hydroxyl functional polymers such as polyesters, polyacrylates and polyethers.
