Technical Data Sheet- Leather Finishing Products

Product Code: AD-35S

DESCRIPTION

A high efficiency polymeric duller for use in leather base coats or topcoats to reduce gloss, increase coverage, and improve processing properties like embossing, milling, staking.

APPLICATIONS

Suitable for use with all types of water base acrylic or polyurethane resins. Can also be used as a line duller in existing base or topcoat formulations to further reduce gloss.

FEATURES

- Non burnishing
- High temperature stability
- Excellent lightfastness and weather resistance
- Smooth surface feel

PROPERTIES

Percent Solids, weight	15
Specific Gravity, 25°C	1.04
pH, typical value	9.1
Viscosity, cPs	500

STORAGE

Store in a cool, dry place, preferably less than 80°F, to ensure a useful shelf life of eighteen months. Protect from freezing.

Quaker Color manufactures all its products under carefully controlled conditions to meet rigid specifications. The values given in this publication are typical values intended as guidelines for the use of the products, they are not specifications. It is the user's responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety. Should you require the actual specifications currently enforced on specific products contact your Quaker Color representative for the appropriate information.
