DESCRIPTION

Ecodis™ N is a cost effective dispersant recommended for use in matt dispersion paints. It contributes to shorten the time needed for a proper incorporation of usual fillers and pigments (calcium carbonate, titanium dioxide) even when a high concentration in solids is required. Ecodis™ N also helps to ensure long term viscosity stability to dispersion paints showing a high solids content and/or a high PVC (pigment volumic concentration).

RECOMMENDED ADDITION LEVEL

The required amount of use varies from 0.2 to 0.5% of active ingredients based on the total weight of paint formulation. It is recommended to disperse the pigments in a PH range between 7.0 and 9.5.
